SUMMARY

Data Analyst using SQL, Python and Excel for process mining, forecasting and KPI design. Delivers validated pipelines and interactive dashboards from operational requirements, explaining findings to managers, operators, and students.

EXPERIENCE

Process Optimization, Automation & AI Specialist Aug 2026 – Present
Multi-Post

- Consolidated twelve preparation, reporting, and audit workflows into a staff-used Django application.
- Built production and machine-event dashboards from department-manager requirements.
- Reduced selected artwork preparation tasks from approximately 30 minutes or more to seconds.
- Automated Dutch failure reporting, Excel updates, photo copying, and Teams notifications.

Junior AI Specialist Jun 2026 – Aug 2026
ADC Nederland

- Delivered an ETL run scanning 7,773 files and completing 6,044 validated conversions.
- Translated operational workflows and database constraints with ICT colleagues and directors.

Teaching Assistant Sep 2021 – Jul 2025
Eindhoven University of Technology

- Coached 80+ students weekly in Python, pandas, SQL, mathematics, and analytical reasoning.
- Diagnosed coding, method, and interpretation errors during labs and project meetings.

PROJECTS

Flowcenter Production Process Mining and Operational Analytics

- Measured median wait, p90 wait, case volume, rework and data quality.
- Combined waiting time, p90 delay, rework, and workload into an operational-pain score.
- Delivered Parquet outputs and an interactive dashboard with product and transition filters.

Energy Disaggregation and Consumption Analytics — Honors Academy / SimEnergy

- Aligned REDD and UK-DALE timestamps and removed missing readings before time-series modeling.
- Built LSTM and denoising-autoencoder models for 10 appliances using cleaned consumption data.
- Aggregated hourly-to-yearly consumption; presented the Dash/Plotly prototype at Energy Now 2023.

UK Police Demand Forecasting and Crime Visualization — Data Challenge 2

- Compared forecasts using MAE, MEDAE and RMSE; selected Holt-Winters for trend and seasonality.
- Delivered interactive maps and predicted-crime views for police-resource allocation analysis.

EDUCATION

MSc Data Science and Artificial Intelligence 2023 – 2025
Eindhoven University of Technology

- Thesis: Reward-Free Safe Reinforcement Learning Exploration Using Different Entropy Measures

BSc Data Science 2020 – 2023
Eindhoven University of Technology and Tilburg University

- Bachelor End Project: Health Platform Text Classification Using Active Learning

SKILLS

Programming: Python, SQL, R

Analytics: Process mining, KPI design, time-series analysis, forecasting, temporal validation

Data tools: pandas, NumPy, MySQL, PostgreSQL, ETL, Parquet, data validation

Visualization and delivery: Power BI, Excel, Dash, Plotly, Streamlit, Power Automate

LANGUAGES

English (Fluent), Cantonese (Native), Mandarin (Fluent), Dutch (A2)
