

Marco Mo - Data Analyst

Eindhoven, The Netherlands | micobruh@gmail.com | +31 6 23925095
linkedin.com/in/cheuk-lam-marco-mo | github.com/micobruh

SUMMARY

Data Analyst using SQL, Python, Excel, process mining, time-series analysis, KPI design, and interactive dashboards. Builds reliable datasets, identifies trends and bottlenecks, and communicates actionable insights to varied stakeholders.

EXPERIENCE

Junior AI Specialist

Jun 2026 - Present

ADC Nederland | Eindhoven, The Netherlands

- Built SQL analytics and process-mining dashboards for operational improvement decisions.
- Analyzed 7,773 files, reporting 6,044 conversions and 1,104 duplicates.
- Defined KPIs for delays, rework, workload, data quality, and tail latency.
- Translated director requirements into filters, visualizations, and actionable recommendations.

Teaching Assistant

Sep 2021 - Jul 2025

Eindhoven University of Technology | Eindhoven, The Netherlands

- Supported 80+ students weekly in Python, pandas, SQL, and data analytics.
- Explained methods, findings, and interpretation to varied technical audiences.
- Graded projects consistently and delivered clear, actionable feedback on results.

Software Technical Lead

Sep 2021 - Jul 2023

Student Team SimEnergy | Eindhoven University of Technology

- Led software delivery for six-person energy analytics prototype team.
- Presented appliance-level consumption insights through interactive Dash and Plotly views.

PROJECTS

Flowcenter Production Process Mining and Operational Analytics

- Queried MySQL event logs to analyze production variants, delays, rework, and workload.
- Defined median wait, p90 delay, case volume, rework, and data-quality KPIs.
- Combined delay, rework, and workload into an operational-pain prioritization score.
- Delivered interactive dashboard with product, component, and transition-level filters.

Energy Disaggregation and Consumption Analytics - SimEnergy

- Cleaned REDD and UK-DALE time-series data by aligning timestamps and missing readings.
- Modeled consumption for ten appliances using LSTM and denoising autoencoders.
- Aggregated hourly, daily, weekly, monthly, and yearly energy metrics.
- Built Dash and Plotly views and presented insights at Energy Now 2023.

Fraud Detection and Monitoring Pipeline - IEEE-CIS

- Analyzed 600,000 transactions and 400+ features using temporal validation.
- Optimized threshold to 0.2138, achieving 0.8311 precision and 0.5960 average precision.
- Built Dash monitoring for prediction trends and feature drift.

EDUCATION

MSc Data Science and Artificial Intelligence | Eindhoven University of Technology

2023 - 2025

- Thesis: Reward-Free Safe Reinforcement Learning Exploration Using Different Entropy Measures

BSc Data Science | Eindhoven University of Technology and Tilburg University

2020 - 2023

- Bachelor End Project: Health Platform Text Classification Using Active Learning

Honors Academy - AI Track | Eindhoven University of Technology

2021 - 2023

- Projects: energy analytics, time-series modeling, dashboards, and GANs

SKILLS

Programming: SQL, Python, R

Analysis: pandas, NumPy, Excel, process mining, KPI development, root-cause analysis

Visualization: Plotly, Dash, Streamlit, Matplotlib, interactive dashboards, reporting

Data Management: MySQL, PostgreSQL, SQLite, Parquet, CSV, JSON, data quality

Methods: time-series analysis, forecasting, classification, cross-validation, trend analysis

LANGUAGES

English (Fluent), Cantonese (Native), Mandarin (Fluent), Dutch (A2)
